SUMMARY

I am a Computer Science and Engineering graduate from BRAC University with interests in Programming, Software Engineering and Cloud Computing. I have been recognized for good teamwork in academic group projects, adaptability and problem solving skills. I am seeking a junior or graduate role in software, data, or ML engineering where I can apply my technical skills and grow professionally.

EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE)

2021 - 2026

- BRAC University

THESIS

- Completed thesis on **"Using Machine Learning to Predict Optimal Erasure Coding Policies for Object Storage System in OpenStack Swift"**.
- Conducted research on workload-aware erasure coding optimization in OpenStack Swift using ML models to predict optimal storage policies, aiming to optimize storage overhead and latency under dynamic failure conditions.

PROJECTS

[Smart Learning Portal | Laravel-PHP](#)

Oct 2025 - Jan 2026

- Developed a learning platform, which is built with Laravel that allows teachers to upload study materials and students to access study materials.
- Implemented user authentication and role-based access control for secure teacher/student interactions.

[Deep Learning Architecture for Text Based CAPTCHA Recognition | PyTorch-Python](#)

May 2025 - Oct 2025

- Developed a deep learning architecture for text-based CAPTCHA recognition using CNN, CRNN, and OCR-based models to read it accurately.
- Generated synthetic CAPTCHA datasets using Python to improve model robustness.

[Schedule Planner | Flask-Python](#)

Jan 2025 - Apr 2025

- Designed a web based system for students to build their custom routine for their studies.
- Applied a routine optimization a generate optimized study schedules using: Genetic algorithm and ant colony optimization.

[Banking System | PHP](#)

Aug 2024 - Dec 2024

- Built a web based system, functionalities such as account creation, deposit, withdrawal, balance inquiry, and transaction history.
- Implemented role-based functionalities for admin and users, including account approval, loan processing, complaint management, and transaction monitoring.

SKILLS

- **Programming & Development:** Python, C, PHP, JavaScript, HTML, React
- **Databases:** MongoDB, MySQL, NoSQL, PostgreSQL
- **Machine Learning, Deep Learning :** Tensorflow, PyTorch
- **Federated Learning:** Flower(FL), FedAvg, FedProx, FedOpt
- **Tools & Technologies:** Git, GitHub, Arduino IDE
- **Frameworks:** Laravel, Flask, Unity, Figma

ACHIEVEMENT

Bronze Award Recipient – The Duke of Edinburgh's Award

- Recognized for leadership, teamwork, resilience, and community service.
